Notice of Water Service Transfer Cedar Street

Dear Resident,

As part of the ongoing utility work on Cedar Street, during the week of July 5, 2016, City contractors will need to install a temporary water bypass in order to take the current water line out of service. The bypass will be installed to the spigot of all properties and requires the main valve located inside the basement of these properties to be closed.

To conduct this work, an official from P. Gioioso, accompanied by an official from the City of Somerville, will need to access your property between the dates of 07/05/16 and 07/08/16, between the hours of 7 a.m. and 3:30 p.m. to close the valve. The bypass will remain in place through approximately the fall of 2016.

Employees will carry proper City identification when requesting access to private residences. If no one is available during this time period, please call John Gioioso at 617-592-3421 to reschedule.

Prior to this work, the temporary water line will be disinfected and tested. All hoses will be NSF 61 approved

While the bypass is connected, you may notice warm water initially due to sun warming the hose. Water should then run cold. If it does not, please contact one of the project staff at the numbers below. When parking on Cedar St., please avoid parking cars on temporary line

For questions on billing, please contact the water department (617-666-3311).

If you have any questions, please feel free to contact any of the project staff:

- Paul Greco, Resident Engineer: On site
- Bryan Manter, City Engineer: bmanter@somervillema.gov, 617-625-6600 x5400
- Peter Violette, Junior City Engineer: pviolette@somervillema.gov, 617-625-6600 x5414
